Another slapped together unity game hoping to make a quick buck. Gameplay is buggy and janky, and overall it's very badly designed; Don't waste your time.

Some Gameplay:

<https://www.youtube.com/watch?v=KjHaMJfroZM>. Hardcore, Grand Strategy title. No crashes 7.1 hours in but lots of fun. Not for the casuals, not for the faint hearted but if you like to feel like a commander thinking over and over again about supply problems and maneuvers on a huge map go for it. You'll get 100s of hours out of both campaigns. End turn times can be a bit long though.. Currently one of the best fighting games on steam. Very similar mechanics and game play to Street Fighter III 3rd Strike.

Only complaint is lack of resolution options, other wise solid game.. dont get it. Never got anything that was in the pack its a money grab.. best♥♥♥♥♥ever

---

While it isn't terrible, Battlepaths plays like a game that should be free on Kongregate.

There are no options to speak of other than turning fullscreen off and on. Which means you can't rebind the awful keyboard layout (you actually have to use Esc for more than just bringing up the game menu!) and you can't adjust any audio setting besides turning off the music.

For a rogue lite, it has a shockingly low challenge level. The death penalty (yeah, you can come back to life!) just subtracts a small amount of experience and gold and sets you at the entrance to the map you were on, leaving all the monsters in their current state.

It ends up just being really boring and annoying to play. Buy when it's 80-90% off if you're curious, otherwise stay away. Go play Dungeons of Dredmor instead.. may start to get boring at first but keep playing its an extremely fun, easy, and satisfying game. I don't get the point of this game.

It reclaims to be a society focused strategy game, but I don't see it.

There are about 10 decisions you are allowed to make, like forbid killing, these decisions have the same 6 options, which are too similar to make a big difference.

The effect of these can be seen in a statistic. And only in the statistic, as you cannot follow the life of the citizens. They don't really have one which would be interesting to watch.

Anyway 90% of your economic power comes from your main character which can do same actions as citizens, but better.

Buildings are also not very deep thought: there are cheap variants of most buildings, which all can be skipped, as they cost only more and resources are infinite. Food/Water/Medics are also spawned out of nothing.

In the end you use your main character to loot the map, build a city and then populate it. People will respawn and die until you supply them... endlessly.

As I stated in the beginning, I don't get the point of what I am supposed to do here. The game tells me I have to make as much people as possible to die at old age, which is pretty easy to achieve(build a senior heaven) and very boring.

Until then you wait and watch them old people die by age.

Maybe it get better by some way, but currently I see no light.. Oh my goodness... A roguelike with great music similar to Rare's N64 stuff, addicting gameplay like SotS: The Pit, a decent level of exploration and curiosity with an in-depth skill tree and crafting system? And... for only five bucks? I'm in love! (Seriously, this game is freaking amazing and everyone owes themselves the pleasure of playing this game). So yeah, go buy it fellow steam perusers.

<https://www.youtube.com/watch?v=fNvOHurbioI>. A good game marred by horrible console porting. Poorly optimized and bad controls (arrow keys instead of a mouse, wtf) means it can be very frustrating to play at times.

But still, you should probably try it anyway. It's like Portal but with more exploding scientists.
