Recommended strongly but really wish they'd add the mega cities expansion for the Europe map which adds a bit more variety to the blue routes.. The map is fun, and the way destination tickets are distributed at the beginning significantly changes the strategy around how to select them. The tunnels are an interesting mechanic, as are the ferries, and the long tunnel to the north presents interesting opportunities and difficulties when playing.. The best game ever made.. I very much enjoy this addition. This is a nice expansion to the base game. The new map introduces a couple of extra rules that genuinely add something to the game. The stations if used wisely allow you to complete routes which have otherwise been blocked off to you. And tunnel add a little element of chance into the game as well. Overall I prefer this map to the original map.. Recommended strongly but really wish they'd add the mega cities expansion for the Europe map which adds a bit more variety to the blue routes.. The best game ever made.
